

THIXOTROPIC DRY FILM LUBRICANT

IP CODE NUMBER: PL198

PRODUCT DESCRIPTION

Single package thixotropic dry film lubricant designed for wet assembly applications on splined shafts and screw threads. For use on steel, light alloys and other metals. Used for example on the front combustion liner for the RB211. For thread lubrication in torque loading applications.

APPROVALS / REFERENCES / SPECS

OMAT 4/20; RR Code 134110

PERFORMANCE

APPLICATION

Stir thoroughly, apply by brush to threads on mating surfaces, allow to dry for 10 minutes for solvents to evaporate before making the joint.
